10 CU FT Furrion Vibrationsmart™ DC Refrigerator

Engineered & Designed for Extended Stay Remote Camping

WHY CHEROKEE CHOSE THE VIBRATIONSMART™ DC REFRIGERATOR

Engineered for Off Grid Camping
Designed for off grid use & utilizing 12-volt power when not plugged into shore power. The Logic Regulation System is engineered for low power consumption and longevity, all while being environmentally friendly.

Vibrationsmart™
Vibrationsmart™ is the latest in technological advancements in mobile refrigerators. Engineered for mobile applications and the rigorous demands, needs and necessities for today’s modern RV. The Vibrationsmart™ system was engineered to withstand those many bumps in the road often found on the trail while trying to get to that perfect camping spot.

Low Power Consumption
The ultra-quiet (low-decibel) power-saving, Furrion Logic Regulation System allows for longer trips than ever before. This technology more than doubles the run time of some competitive brands. Coupled with Cherokee’s dual battery capacity, this system allows you to enjoy those long 4-day weekends off-grid with no worries.

Efficiency
The efficient compressor allows the system to cool down much faster and more efficiently than old style refrigerators. This allows you to easily prepare for those quick trips away—no need to wait so long for the cool down process. Some of the best trips are spontaneous, take advantage of them with the new Cherokee.

Environmentally Friendly
The Furrion Vibrationsmart Refrigerator maintains one of the industry’s first environmentally friendly compressor cooling systems. Along with this, we further Cherokee’s leadership role and GO GREEN initiative by utilizing a RENEWABLE power source, and reduce the need for a NON-RENEWABLE resource.

High Capacity Refrigerator
66% more than industry standard 6 cubic foot. Cherokee allows you to take more campers with you for a longer period of time. Feel more confidence and less stress knowing that you can store enough supplies for your “Pack” to cover extended trips.

Save Time and Money
Save time and money because you won’t need to refill the LP bottles as often. There are getting to be fewer and fewer locations that are able to fill the LP bottles, and trying to make it to some of those inconvenient places during certain hours can consume an entire vacation day. Spend your time and money how you want and with whom you want.

First Class Coast-to-Coast Service
The Furrion Vibrationsmart Refrigerator is backed by LCI’s 1st class service from coast-to-coast. 24-hour assistance is available when you need it, and LCI has field technicians actively involved with the Cherokee production team to ensure the best product possible.
